

0-5 Activity Sheet

Nature Collage

Nature Collage is a wonderful way for children to interact with nature and take a little bit home. It is a great sensory experience that gets your kids outdoors and they can create some wonderful art. It's a lovely opportunity to encourage talk about what they see, what they feel, what they smell, what they touch and what they hear.

What you need:

- Paper or cardboard
- Glue (sticky)
- A collection of natural items from a garden eg (small sticks, bark, flowers, leaves, small stones).

How to:

1. Grab your cardboard, paper or paper plate.
2. If you haven't already collect your nature collage items.
3. Use your glue to stick down your nature items onto your piece of cardboard or paper.
4. You can create as many as you would like. Try to make patterns and pictures out of you items. Here are some examples below.
