

Scenic Rim Planning Scheme 2020

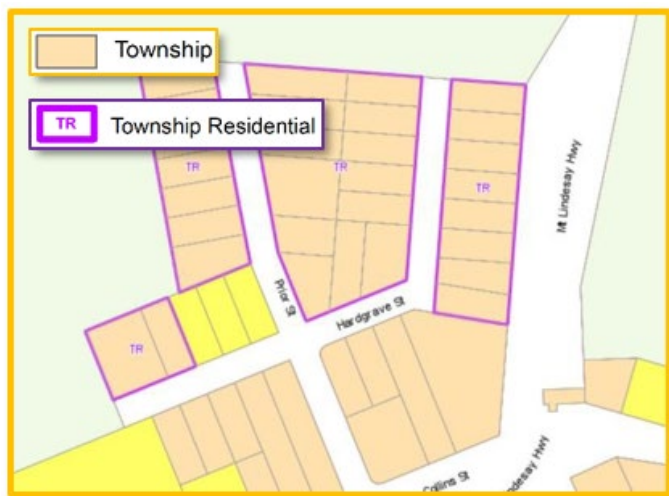

How do I determine a level of assessment for Material Change of Use

The following steps determine the level of assessment for a use (a Material Change of Use) under the planning scheme:

1. Find my zone

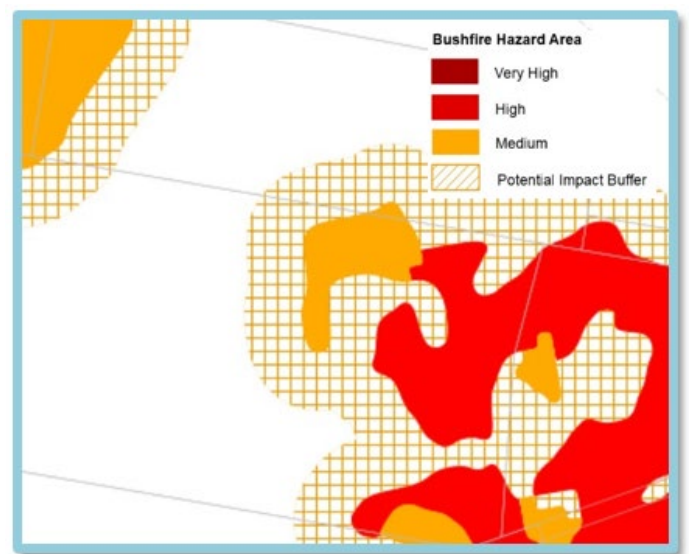

Locate the property using the Online Mapping tool on Council's website. A copy of the PDF maps can also be found in the planning scheme documentation in **Schedule 2 Mapping**. The zone legend that corresponds with the mapped colour will indicate the zone of the property. If the land is contained within a purple line, it indicates that a precinct also applies.

2. Check for any overlays that may apply

Overlay maps, also found by using the Online Mapping tool or referring to the PDFs in **Schedule 2 Mapping**, will indicate if a property, or part of a property, is affected by an overlay or several overlays. Mapped constraints and values may include, for example, bushfire, flood and vegetation. An overlay may affect the level of assessment.

Note - where a property is partially affected by an overlay, if development is located completely outside the mapped area, the development is not affected by that overlay (e.g. white areas below are outside the Bushfire Hazard Area and these white areas are not affected by the Bushfire Hazard Overlay).

3. What is my "use"?

Schedule 1 Definitions provides a list of over 90 defined uses. Where development does not fit one of these defined uses, it is considered to be an "undefined use". Columns 3 and 4 of the use definitions assist by providing examples of what is or is not included in the definition.

| Regulated requirements | | Guidance | |
|------------------------|--|---|---|
| Column 1 Use | Column 2 Definition | Column 3 Examples include | Column 4 Does not include the following examples |
| Market | Means the use of premises on a regular basis for - (a) Selling goods to the public mainly from temporary structures (stalls, booths or trestle tables, for example); or (b) Providing entertainment if the use is ancillary to the use in paragraph (a). | Flea market, farmers market, car boot sales | Shop, Roadside stall |

4. Tables of Assessment

FIRSTLY, go to the appropriate zone table in **Part 5 Tables of Assessment** and find the defined Use.

| Use | Categories of development and assessment | Assessment benchmarks for assessable development and requirements for accepted development |
|---------------|---|---|
| Community use | Accepted | |
| | If: (1) Located in an existing commercial building; and (2) Not involving building work (other than minor building work). | Not applicable |
| | Code assessment | |
| | If not Accepted | Township Zone Code Earthworks, Construction and Water Quality Code General Development provisions Code Infrastructure Design Code Landscaping Code Parking and Access Code |

In this example, the use (Community use) is **accepted** development with no requirements to meet any assessment benchmarks (see the third column). Provided it meets both qualifiers (1) **and** (2), planning approval is not required. If it does not meet the qualifiers in (1) and (2), the use is **code assessable** and would need a development application that is assessed against the assessment benchmarks (i.e. the codes) listed in the third column.

Note - If you cannot find your use listed in the zone, the use is **impact assessable** and planning approval will be required.

SECONDLY, check the tables of assessment in **Section 5.10** for any overlays that apply. Generally, the higher level of assessment will prevail.

Levels of assessment

Accepted development is development that does not require planning approval.

Example of accepted development in a table of assessment for a zone.

| Use | Categories of development and assessment | Assessment benchmarks for assessable development and requirements for accepted development |
|---------------------|--|--|
| Community residence | Accepted | |
| | | Not applicable |

Example of accepted development in a table of assessment for an overlay.

| Use | Categories of development and assessment | Assessment benchmarks for assessable development and requirements for accepted development |
|--|--|--|
| Material Change of Use where involving exempt clearing | Accepted | Not applicable |

Accepted subject to requirements is development that does not require planning approval provided that the development can meet all the relevant assessment benchmarks (i.e. the codes) identified in the planning scheme. If development does not meet all codes, an application for **code assessable development** is required and it is only assessed against the specific outcomes that are not met.

Example of **accepted subject to requirements** in a table of assessment for a zone.

| Use | Categories of development and assessment | Assessment benchmarks for assessable development and requirements for accepted development |
|---------------|--|--|
| Dwelling unit | Accepted subject to requirements | |
| | If located above the ground storey or behind a Commercial activity | Parking and Access Code |

Example of **accepted subject to requirements** in a table of assessment for an overlay.

| Use | Categories of development and assessment | Assessment benchmarks for assessable development and requirements for accepted development |
|---|--|--|
| Material Change of Use in the: (1) Height Restriction Zone; or (2) Wildlife Buffer Area; or (3) Building Restricted Area | Accepted subject to requirements | Airport Environs and Defence Land Overlay Code |

It has been prepared to assist the community in understanding parts of the Scenic Rim Planning Scheme.

Example of **accepted subject to requirements** in a table of assessment for an overlay.

| Use | Categories of development and assessment | Assessment benchmarks for assessable development and requirements for accepted development |
|--|--|--|
| Material Change of Use in the: (4) Height Restriction Zone; or (5) Wildlife Buffer Area; or (6) Building Restricted Area | Accepted subject to requirements | Airport Environs and Defence Land Overlay Code |

Assessable development is development that requires an application to be submitted to Council for assessment. There are two types of assessable development: code assessable development; and impact assessable development. **Code assessable development** is assessed against the relevant assessment benchmarks (i.e. the codes) identified in the planning scheme and does not involve public notification. **Impact assessable development** is assessed against the whole of the planning scheme, including the strategic framework (Part 3). It also involves public notification.

Example of **code assessable** and **impact assessable** in a table of assessment for a zone.

| Use | Categories of development and assessment | Assessment benchmarks for assessable development and requirements for accepted development |
|---|--|--|
| Telecommunications facility | Code assessment | Telecommunications Facility Code Earthworks, Construction and Water Quality Code General Development Provisions Code |
| | | |
| Impact assessment | | |
| Any other use not listed in the table | | The Planning Scheme |
| Any other use in this table and not meeting the description listed in the categories of development and assessment column | | |
| Any other undefined use | | |

Example of **code assessable** in a table of assessment for an overlay.

| Use | Categories of development and assessment | Assessment benchmarks for assessable development and requirements for accepted development |
|---|--|--|
| Material Change of Use where not Accepted Development and for any other use in a Flood Hazard Area | Code assessment | Flood Hazard Overlay Code |

Assessment Benchmarks

The third column in the tables of assessment lists the assessment benchmarks for development identified as **assessable development** and development that is **accepted subject to requirements**. In this column you will find the list of codes that are applicable to the proposed development and these would need to be addressed if a planning approval is required.

Impact assessable development is assessed against the whole planning scheme, including **Part 3 Strategic Framework**.
