

Scenic Rim Planning Scheme 2020

Zone Codes

What is a zone?

Properties are categorised into a zone under the planning scheme in a way that facilitates similar preferred or acceptable land uses in a particular location. The planning scheme zone maps reflect a zone for each parcel of land in the region. The mandatory zone names, purpose statements and map colours are prescribed by the *Planning Regulation 2017*.

The zone maps also identify if a precinct applies within a zone. Precincts may be used within zones to provide a more refined planning intent for specific areas. A precinct may vary the provisions (for example height, gross floor area, scale etc.) for areas in the zone. Also, precincts remain within zone boundaries and do not cross over different zones.

Where can I find my zone or precinct?

To find zone and precinct information for your property, an interactive Online Mapping tool is available on Council's website www.scenicrim.qld.gov.au/mapping, or you can view the planning scheme mapping in PDF in [Schedule 2 Mapping](#)

Knowing your zone and precinct (if applicable) assists in identifying your level of assessment for development and the codes (ie. the assessment benchmarks) applicable for the development, which are located in [Part 5 Tables of Assessment](#) of the planning scheme.

What are zone codes?

[Part 6 Zones](#) contains the zone codes for the region which outlines the requirements for uses in each zone. Each zone code identifies the following:

- (a) the purpose of the code;
- (b) the overall outcomes that achieve the purpose of the code;
- (c) the performance outcomes that achieve the overall outcomes and the purpose of the code;
- (d) the acceptable outcomes that achieve the performance and overall outcomes, and the purpose of the code; and

- (e) a list of consistent uses and potentially consistent uses for each zone and precinct.
