

EAGLESFIELD STREET AND TINA STREET INTERSECTION

Project Update September 2026

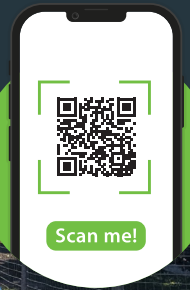

Image 1: Kerb installation now complete on the western half of the project.

Construction of a new roundabout at the intersection of Eaglesfield Street and Tina Street, Beaudesert is progressing well.

This project is jointly funded by the Australian Government Black Spot Program in association with the Scenic Rim Regional Council.

MILESTONES

Works are well underway. To date, the construction team has:

- removed the existing road pavement on the western side
- switched construction activities to the eastern half of the road
- installed a temporary seal on the western half of the road to maintain access and traffic movements
- installed a new underground culvert line on the western side to improve drainage and support the long-term performance of the road network, and
- completed kerb installation on western side, and
- commenced removal of the existing pavement on the eastern side.

What are culvert lines

A culvert line is a series of pipes or box drains installed under a road, driveway, or other structure. Its purpose is to manage the flow of rainwater away from the road surface, and protect the road from water damage.

WHAT TO EXPECT NEXT

The next stages of works will include:

- installing new underground culvert lines beneath the intersection on the eastern side
- installing road pavement gravel
- installing kerb and channelling on eastern side, and
- completing the remaining stormwater infrastructure works.

These activities will prepare the site for the next phase of the road reconstruction and associated improvements.

TIMEFRAMES

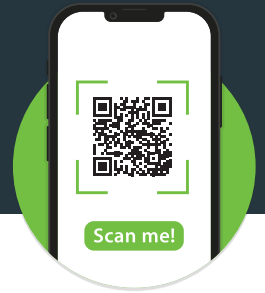

While the project has experienced some delays due to unforeseen site conditions, construction works are continuing and completion is now expected in mid-October 2026. Council appreciates the community's patience and understanding as these unexpected circumstances are being addressed.

To enable these works to be completed safely, Eaglesfield Street will continue to be closed near the intersection.

Tina Street will remain open under various traffic control arrangements, ensuring safe access is maintained to Beaudesert Hospital, Queensland Ambulance Service facilities, Beaudesert State School, and the large vehicles that service these important community locations.

Project Update September 2026

PLEASE BE SAFE

Traffic

We remind all motorists to follow signage, adhere to reduced speed limits, and take extra care when travelling through road work zones to ensure the safety of workers and road users.

Pedestrians

Access to all footpaths will be maintained; however, pedestrian detours may be in place to ensure safe movement around the works. We ask that pedestrians continue to adhere to the signage.

Thank you for continuing to support us whilst we implement these important infrastructure works.

We apologise for any inconvenience this may cause and appreciate your support as we undertake these important works. Council is committed to keeping the community up to date as this project progresses.
