

# TAMBORINE MOUNTAIN GALLERY WALK PRECINCT

Project Update November 2025

*Completed 2022: Artist's impression of Tamboorine Mountain Gallery Walk Precinct*

**The carpark's foundational works, including kerb and channeling, are shaping the site and offering a glimpse of the final layout.**

This project is jointly funded by the Queensland Government's South East Queensland Community Stimulus Program and Scenic Rim Regional Council.

The project timeline for the completion of the carpark has been extended from 12 to 14 months. This adjustment reflects delays caused by adverse weather conditions and is intended to prevent construction activities from coinciding with the peak Christmas and school holiday period, thereby minimising disruption to the community and local businesses.

## LATEST UPDATE

- **BIO BASIN:** Construction of the bio basin has now commenced. This feature is designed to filter and manage stormwater runoff, and supports sustainable drainage.
- **KERB AND CHANNELLING:** Kerb and channel construction works are continuing. These works involve building concrete road edges and drainage channels to improve stormwater management and road durability.
- **SANDSTONE RETAINING WALL:** The carpark entrance is really starting to take shape, with the sandstone retaining blocks now being carefully placed into position.

# TAMBORINE MOUNTAIN GALLERY WALK PRECINCT

Project Update November 2025

## PLANNED WORKS

- **KERB AND CHANNEL:** Kerb and channel construction works have commenced and are progressing well. As part of Council commitment to accessibility and safety for all users, pram ramps and vehicle cross overs will be also be installed. These features are essential for safe, inclusive and efficient movement throughout the area.

The carpark's kerb and channel installation is advancing, with the overall layout now becoming evident.

- **SANDSTONE RETAINING WALL:** Construction of the sandstone retaining wall, which serves both as a structural feature and defining entrance to the carpark, is underway. The natural sandstone blocks, provide both structural support and visual appeal. Completion is anticipated by mid-November, weather and site conditions permitting.

The wall will coupled with surrounding landscape, will form a distinctive carpark entrance.

- **BIO BASIN:** A bio basin is a shallow, vegetated area that captures stormwater run-off. As water flows through, it's naturally filtered by layers of soil, mulch and plants. This process reduces water flow, improves water quality and supports local biodiversity.

Construction equipment such as excavators, trucks, and backhoes will be operating on site, which may result in noise and vibration during the works. Materials will continue being delivered via Long Road, Tamborine Mountain, under strict traffic management and with appropriate road signage to ensure safety. Water trucks will also be used throughout this project to mitigate dust.

## THANK YOU

Council understands these works may cause some inconvenience for residents, businesses and road users. Thank you for your patience and support.

## MORE INFORMATION ON THE PROJECT

**Visit:** Tamborine Mountain Gallery Walk Precinct webpage by scanning the QR code in at the top of this page. Any enquiries regarding the works should be directed to Council on **5540 5111** or by email to **mail@scenicrim.qld.gov.au** quoting '**Tamborine Mountain Gallery Walk Construction**'.
